Madhavi

AI Intern (Generative AI Focus)

dixitmadhavi12@gmail.com • 8445382563 • Mathura, India • in/madhavi-dixit-a6a158320

PROFESSIONAL SUMMARY

Software Development Intern with experience in frontend development and a strong interest in learning Generative AI. Skilled in Python and web development frameworks. Completed internship and academic projects including UI card designs for news articles. Eager to grow skills in AI and software development through hands-on projects and realworld experience.

EXPERIENCE

SDE Intern at Glance — 10JUNE 2024 — 10 JULY 2024

Assisted in frontend development of news article cards for Glance platform.
Worked on basic UI improvements and layout adjustments for news feed cards.
Learned software development workflow and collaborated with team using Git

SDE Intern at Glance — 1 JUNE 2025 — 15 JULY 2025

Developed a system to generate news cards from batches of news articles.
Wrote Python scripts to process articles and select relevant content for card creation.
Created 5-card outputs per batch for internal testing and UI integration.
Collaborated with team to implement automation workflow for news card generation.

PROJECTS

Invisible Cloak (Python, OpenCV)

Built a real-time invisibility cloak effect using Python and OpenCV by detecting a target color and replacing it with the background, gaining hands-on experience in computer vision and video frame manipulation.

NLP Pretraining Pipeline (Python, Hugging Face Transformers)

Explored NLP pretraining workflows with transformers, implementing tokenization and model training pipelines.

PCA Breast Cancer Analysis (Python, Pandas, NumPy)

Cleaned and transformed datasets for analysis, practicing data handling and preparation for ML workflows.

Data Processing with Pandas (Python, Pandas, NumPy)

Cleaned and transformed datasets for analysis, practicing data handling and preparation for ML workflows

Hand Gesture Controlled Virtual Mouse (Python, OpenCV, MediaPipe, PyAutoGUI)

Developed a computer vision project to control the mouse cursor using hand gestures via a webcam, implementing real-time cursor movement and click actions while gaining hands-on experience with computer vision and human– computer interaction techniques.

AREAS OF EXPERTISE

Design: Figma , Canva , Wireframing (basic) Product Design Concepts (learning)

Technical: Python , Machine Learning (learning) Generative AI (exploring) Data Analysis: Pandas, NumPy (practice projects) PyTorch , Git & GitHub (version control basics)

EDUCATION

BTech AI cse, Shoolini University **2023- 2027**

Studied Artificial Intelligence and Computer Science. Gained foundational knowledge in AI, programming, and machine learning concepts.

High School , Higher Secondary School, Ramanlal Shorawala Internation School 2021-2022

Completed Higher Secondary education with focus on science and mathematics
